A highly driven individual looking for a challenging position in an organization specializing in tech which will be the impetus to my professional and personal prosperity and will play to my strengths. My fields of interests are Android development, web development, Software Quality assurance and data science. I have a lot of team work experience.

## EDUCATION

### Study Program

#### Bachelor of Computer Science at FAST National University

2016 - 2020

##### Courses

- Object Oriented Design and Analysis
- Data Science (beginner)
- English Language
- Web development
- Software Mobile Development
- Database
- Software Quality Assurance
- Software Engineering

## WORK EXPERIENCE

### Final Year Project at FAST Workplace/Company

##### Achievements/Tasks

- Done final year project with my team members named auto-tow an android application using MVVM ,dagger,data binding, Firebase, Google maps and other related technologies .This application will finish the gap between Vehicle owner and tow service, gets your location and provides nearest tow service available.The application will give opportunities to tow service centres to make their services online.

### Teacher Assistant at FAST Workplace/Company

##### Achievements/Tasks

- The position of TA for Software Engineering course taught me to manage the the work load and helped me to revise and learn new software engineering concepts.

### Beginner Freelancer at Android Workplace/Company

##### Achievements/Tasks

- I was always eager to initiate the fiver and other sites for android developing. I'm beginner at this and it helped a lot to gain experience by building small applications like music player using Firebase and application to represent a school.

## SKILLS

Java Android R C++ Python (beginner)  
PyCharm Eclipse SQL SQA Selenium  
Visual Studio Data Science Content Writing  
Essay writing Team Work Communication
